10. [redacted] Met with Mr. Robert D. Wells, in the office of Representative Charles Chamberlain, in response to Mr. Wells' earlier call. Mr. Chamberlain is extremely concerned over information coming out of Vietnam through news media. In particular he desires information on an aerial photograph of Khe Sanh reported to have been taken by a Japanese UPI photographer which has appeared in several news magazines and the Washington Post of 15 March. I was able to satisfy Mr. Wells that neither NPIC nor the Agency plays a role in the possible control of such releases. Mr. Chamberlain will be referred to DOD.

12. [redacted] Talked with Bob Harris, Senate Labor Committee staff, regarding Senator Ralph Yarborough's bill (S.1779), to establish an International Health, Education and Labor Foundation. I again thanked Mr. Harris for alerting us to Senator Yarborough's special Subcommittee to consider this legislation. I added that while we had no particular suggestions at this time, he might wish to contact Jim Clarke, Bureau of the Budget, who served as the staff assistant to the Rusk Committee. Mr. Harris thanked me for this information and said that there are, at present, no plans for hearings on this bill for at least a month.
